We all have question, that do young people today make good use of their free time? I think that now we have any hobbies, because we sit spends too much time on her computer. For example: we have problem, to name "FOMO", this's problem spends too much time. About 99% of teenagers say that they get this feeling, but people of all ages experience FOMO. Then so how can we fight FOMO? For these says Dr. Kynan: But before bed tonight, put your phone in another room, and before you go to sleep, think about the interesting things you're doing this week, and remember how lucky you are. How we see, we have good idea. By the way: we should make good use of their free time.

Nowadays, we have a lot of spheres where we can achieve our skills. Young people are the future of our world. Do they make the right decision on how they spend their free time.

Firstly, the way people spend their free time depends on their personality. However, the trends show that they prefer to achieve skills and study more on a daily routine. All of us have different interests and hobbies. So, that is why teenagers visit diversity of courses and webinars.

Secondly, people care about career as well as they think about their health. In social media many influencers show the importance of living healthy lifestyle. Consequently, young people want to have balance diet, regular sport, and a good sleeping routine. Also they care about mental health and spiritual development. These are the reason why they visit yoga classes and many different courses.

Nevertheless, as I met it was written earlier, the way people spend their free time depends on their personality and people who around them. If they live in a community where the most important thing to do is to go to the club, they will think the same way.

Finally, the trends show that young people prefer to live a healthy lifestyle and develop as a person. They want to have a good career development. However, there are some people who don't want it.
